Skills

Selected Skills: Ci/cd

Selected Skills: Github actions

Experience

GEICO Tech — Senior Software Engineer Recent role

- CI/CD: Architected a standardized CI/CD pipeline framework in partnership with the Paved Road team, establishing consistent, reusable GitHub-based workflows for thousands of engineers and applications across the organization.

GEICO Tech — Software Engineer II Recent role

- Developed a release governance platform enforcing internal deployment policies across Azure DevOps and GitHub, validating over 15,000 deployment pipelines through Azure DevOps Pipeline Decorators and GitHub Deployment Protection Rules.

GEICO Tech — Software Engineer I Recent role

- Observability: Developed and supported GEICO's enterprise observability platform leveraging Grafana Loki and Prometheus, enabling organization-wide migration from Splunk across thousands of engineers.
- Observability: Partnered with engineering teams to migrate over 2,000 Splunk queries, 300 dashboards, and 500 alerts using LogQL and PromQL while improving query performance and observability efficiency.

Education

Stony Brook University

Stony Brook, NY

Bachelor of Science: Computer Science

Graduated May 2023
